

"2 X 3 STANDARD" CYPRESS PLANTER

ASSEMBLY INSTRUCTIONS

Travis Creek Wood Products

HERITAGE GARDEN COLLECTION © Designed by Kilian

A - 5 bottom boards

B- 2 leg ends

C - 2 sides

D - 8 bolts and washers.

Cypress resist decay and rot and is perfectly suitable for direct soil planting of vegetables or flowers or may be used with potted plants (*landscaping fabric may be used to line bottom for soil planting. Planter drains throughout bottom*).

**Cypress will turn a silver grey if left natural or may be stained or sealed if desired. Natural Wood Products are expected to develop checks & anomalies over it's lifetime. -

1) Lay (**B**) side legs on edge, span the bolt holes with (**C**) sides and tighten with 1/2 wrench until snug.

DO NOT OVER TIGHTEN.

2) flip assembly and repeat step 1.

3) Stand planter up and drop in slats as show:
